

August, 1st, 2016

Good Morning,

I met with FPL and Mastec (FPL bore contractor) this morning on Gulfshore Blvd North regarding the bore in the medians. They will be starting today and running down the east side of the medians. They expect this project to take several weeks but should stay ahead of our landscape project.

They will be removing some of the bricks in the paver bullnoses to get the bore/wires to the poles. In addition, there are areas with no hand holes so they will be installing these where missing.

I did provide the Mastec project manager my cell phone should they have any problems, questions, or concerns as they move thru this project.

Please let me know if you have any questions or concerns.

Thank you,

Heather Shields

FPL is starting their boring project today. This is very good news for the median project as it means the FPL project is not likely to interrupt or delay the City's landscape contractor.

As with all construction project, there is the possibility that Mastec could encounter unforeseen circumstances. Heather and I will maintain good communication with Hannula and Mastec to mitigate conflicts.

Best wishes,

Dana A. Souza
